

Announcing...

www.drymouth.info

"It's where patients and professionals go for dry mouth info."

Wrigley is proud to support **www.drymouth.info**, an educational and informational web site on xerostomia designed for consumers and health care professionals.

Using their own specialized link on the site, practitioners can:

- Get an overview of the latest data and many peer-reviewed references on the prevalence of xerostomia and the interactions between drugs and dry mouth
- Search a database of xerogenic drugs, including generic and US brand names and drug classes
- Learn why xerostomia is under-reported as an adverse effect of many medications
- Learn xerostomia's associated symptoms and other, non-drug-related causes of dry mouth
- Find information about a wide variety of treatments for xerostomia; and link to other sources of information on dry mouth

And for patients:

On the consumer side of the Web site, patients can learn about the causes of dry mouth and the steps they can take to help alleviate their symptoms. Consumers are urged to discuss any

symptoms of persistent dry mouth with their health care providers and they can find information on dry mouth that will help focus their discussions with these professionals.
