

DENTAL HYGIENE CLINICAL EXAMINATIONS SUMMARY

March 2011

American
Dental
Hygienists'
Association

Regional and state clinical dental hygiene examinations are administered to evaluate the clinical competency of candidates for dental hygiene licensure. Clinical examinations provide a reliable third party assessment of candidates' clinical skills and are used by state dental boards in making valid licensing decisions.

All exams consist of skill-specific patient treatment in a clinical setting. Additionally, some exams include a written or electronic patient-based component. Clinical licensure exams are administered at various times throughout the year at various host institutions.

This document was created by the American Dental Hygienists' Association (ADHA) to assist candidates for dental hygiene licensure by providing a general overview of regional and state clinical examinations required for licensure for the practice of dental hygiene.

Included in this Dental Hygiene Clinical Examination Summary are the regional testing agencies known as

- *Council of Interstate Testing Agencies (CITA),*
- *Central Regional Dental Testing Service (CRDTS),*
- *North East Regional Board of Dental Examiners (NERB),*
- *Southern Regional Testing Agency (SRTA) and*
- *Western Regional Examining Board (WREB)*

This summary is intended for general comparison only. For specific exam protocol, procedure, requirements and forms, please refer to the complete Candidate's Manual for each examination or contact the agency responsible for the administration of the examination.

ADHA defines *Initial Licensure* as state licensure sought immediately following graduation from an accredited dental hygiene program.

Please note that recognizing jurisdictions and licensing requirements are subject to change. While this document is updated yearly, candidates are encouraged to contact the State Board where they wish to seek licensure to confirm information.

Clinical Examinations Accepted for Initial Licensure

Please note that recognizing jurisdictions and licensing requirements are subject to change. While this document is updated yearly, candidates are encouraged to contact the State Board where they wish to seek licensure to confirm information.

* Information is based upon individual calls to the respective State Boards of Dentistry.

ADHA defines Initial Licensure as state licensure sought immediately following graduation from an accredited dental hygiene program.

Date: February 7, 2011

This summary is intended for general comparison only. For specific exam protocol, procedure, requirements and forms, please refer to the complete Candidate's Manual for each examination or contact the agency responsible for the administration of the examination.

Patient Treatment Selection Requirements

CITA

- Candidate must select 6-8 teeth upon which the candidate will designate twelve (12) surfaces of explorer-detectable subgingival calculus for removal.
- Four of the teeth and at least 8 surfaces must be in posterior teeth; four of these posterior surfaces must be interproximal.
- Selected teeth must have at least one approximating tooth within a 2mm distance.

CRDTS

- Candidate must select 6-10 teeth, including no more than 3 anteriors, with at least 14 surfaces of qualifying subgingival calculus.
- Of the 14 qualifying surfaces, at least 9 must be on posterior teeth, and of those, at least 3 surfaces must be on molars.

Prohibited treatment selections (if in the areas of selected treatment):

- Grade III or IV furcations
- Grade III mobility
- Class IV periodontal disease
- Ortho brackets or bonded retainers
- Implants
- Partially erupted 3rd molars
- Retained deciduous teeth

NERB *

- Candidate must select 6-10 permanent teeth with 12 surfaces of subgingival calculus.
- Of the 12 surfaces, 8 must be on posteriors; 5 must be interproximal surfaces. Three of these interproximal surfaces must be on molars.
- All posterior teeth must have at least one approximating posterior tooth within 2mm distance.
- Selection must include three pockets of 4mm or greater, each on a different tooth.

SRTA

- Candidate must select one full quadrant and up to 4 additional teeth with a minimum of 12 surfaces of qualifying subgingival calculus.
- The selected quadrant must contain at least 6 natural teeth; at least one tooth in the quadrant must be a permanent molar with at least 1 proximal contact.
- Of the 12 surfaces, a maximum of 6 can be on anterior teeth; a minimum of 5 on proximal posteriors and a minimum of 3 must be on molars.
- Candidates are encouraged to avoid choosing teeth with excessive decay.

WREB

- Candidate must select one full quadrant and up to 4 additional teeth, including 1 molar with a proximal contact and at least 6 natural teeth.
- Selection must include a minimum of 12 surfaces of qualifying subgingival calculus.
- At least 3 of the 12 surfaces must be on molars; no more than 4 of the 12 may be on anteriors.

Prohibited treatment selections (if in the areas of selected treatment):

- Probing depths >6mm
- Class III furcations; Class III mobility
- Ortho bands
- Overhanging margins; temp. or faulty subgingival restorations
- Gross caries

This summary is intended for general comparison only. For specific exam protocol, procedure, requirements and forms, please refer to the complete Candidate's Manual for each examination or contact the agency responsible for the administration of the examination.

Radiographic Component

<u>CITA</u>	<u>CRDTS</u>	<u>NERB</u> *	<u>SRTA</u>	<u>WREB</u>
<p>Complete Mouth Series (exposed within 2 years) with horizontal or vertical bitewings (exposed within 6 months) reflecting current clinical conditions</p> <p>Radiographs of poor diagnostic quality result in point deductions and could affect patient acceptability.</p>	<p>Complete Mouth Series (exposed within 3 years) with horizontal or vertical bitewings (exposed within 1 year) OR</p> <p>A panoramic radiograph (exposed within 3 years) and horizontal or vertical bitewings (exposed within 1 year)</p> <p>Radiographs are non-graded; however radiographs of poor diagnostic quality will affect patient acceptability.</p>	<p>Complete Mouth Series (exposed within 3 years) including bitewings (exposed within 1 year).</p> <p>Radiographs are non-graded; however radiographs of poor diagnostic quality will result in point deduction or discontinuation of exam.</p>	<p>Complete Mouth Series (exposed within 3 years) with horizontal or vertical bitewings (exposed within 1 year).</p> <p>Radiographs are non-graded; however radiographs of poor diagnostic quality will affect patient acceptability.</p>	<p>Horizontal or vertical bite-wings with anterior and posterior periapicals that include all teeth in treatment submission.</p> <p>Radiographs taken within 12 months; not necessarily exposed by candidate.</p> <p>Radiographs that do not meet Evaluation Criteria listed in Candidate's Guide are assessed a four point penalty.</p>

Computer Component

<p>Proof of candidate's successful completion of the Dental Hygiene National Board Examination administered by the Joint Commission on National Dental Examinations (JCNDE) is required.</p>	<p>No computer-based exam included.</p>	<p>100 multiple-choice, simulated patient questions - 2 hrs in length.</p> <p>Taken at Prometric Testing Centers by appointment.</p>	<p>Multiple-choice questions – 60 minutes in length.</p> <p>Electronic examination taken at the same site on the same day as the clinical exam.</p>	<p>Case-based exam containing multiple choice, multiple response and development of a care plan – 90 minutes in length.</p> <p>Taken at Pearson VUE Centers prior to clinical exam.</p>
--	---	--	---	---

This summary is intended for general comparison only. For specific exam protocol, procedure, requirements and forms, please refer to the complete Candidate's Manual for each examination or contact the agency responsible for the administration of the examination.

Administration of Local Anesthesia

<u>CITA</u>	<u>CRDTS</u>	<u>NERB</u> *	<u>SRTA</u>	<u>WREB</u>
<p>Local anesthetic administration is not permitted.</p> <p>Topical anesthetic administration only.</p>	<p>Admission of local anesthetic by candidate permitted as determined by each state practice act. Confirmation of local anesthesia training required.</p> <p>Qualified practitioner may administer local in lieu of candidate.</p> <p>A subgingival anesthetic gel may be used.</p> <p>Not evaluated as part of the exam.</p>	<p>Injectable local anesthetic is not permitted.</p> <p>Topical anesthetic administration only.</p>	<p>Admission of local anesthetic by candidates who have successfully completed a course on local anesthesia from a CODA accredited program is permitted.</p> <p>Qualified practitioner may administer local in lieu of candidate who is not qualified to administer.</p>	<p>Administration of local anesthetic by candidate is permitted.</p> <p>Successful completion of <i>WREB Written and Clinical Local Anesthesia</i> examination required prior to the clinical exam.</p> <p>Qualified practitioner may administer local in lieu of candidate.</p>

* Currently, NERB is the only agency that administers the American Dental Hygiene Licensing Examination (ADLEX), the dental hygiene examination approved by the American Board of Dental Examiners, Inc (ADEX). ADEX is a private not-for-profit consortium of state and regional dental boards throughout the United States and its territories, whose mission is to provide the dental community with test construction and administration standardization for national uniform dental and dental hygiene clinical licensure examinations.

This summary is intended for general comparison only. For specific exam protocol, procedure, requirements and forms, please refer to the complete Candidate's Manual for each examination or contact the agency responsible for the administration of the examination.

Exam Scoring

<u>CITA</u>	<u>CRDTS</u>	<u>NERB</u>	<u>SRTA</u>	<u>WREB</u>
Score of 75% or higher on each required to pass:	Score of 75% or higher required to pass:	Score of 75% or higher on each required to pass:	Score of 75% or higher on each required to pass:	Score of 75% or higher required to pass:
